*Household size must be supported by the number of names listed on the meal benefit income eligibility form.

Annual Income Conversion for Multiple Reported Incomes:

If a household reports only one income or multiple incomes with the same frequency, do not convert to annual income. If a household reports multiple income sources with different frequencies (e.g., 1 income is received weekly, another income is received monthly), convert all reported incomes to annual using the conversion factors below. Then, add the income together and compare it to the annual income guidelines to make a determination.

Weekly Income x 52	Bi-Weekly Income x 26	2x Month Income x 24	Monthly Income x 12
--------------------	-----------------------	----------------------	---------------------

Example: A household has returned their meal benefit income eligibility form. The enrolled individuals are not categorically eligible so they must be categorized based on income. On their application, they reported two incomes: \$200 weekly and \$3,000 monthly. To determine their eligibility status, their incomes must be converted to annual income.

\$200 weekly x Weekly Income Conversion → \$200 x 52 = \$10,400 Total Annual Income

\$3,000 monthly x Monthly Income Conversion → \$3,000 x 12 = \$36,000 Total Annual Income

The incomes are then added together to determine total annual income. Total Income: \$10,400 + \$36,000 = \$46,400

There are four listed names on their meal benefit income eligibility form – demonstrating a household's size of four. The annual income cap for a household of four to be free is \$39,000 and reduced is \$55,500. This household's annual income is \$46,400 – greater than \$39,000, less than \$55,000. Therefore, this household qualifies for reduced-price meals.
